

CONCERTS AND PROMOTION OF YOUNG TALENT

Band coaching, stage performances & songwriting

Since 2010, we and our students have been treating audiences with the annual concert experience **Tomate Rockt!** In solo or band sets, kids and young people are able to show their skills in front of a big crowd at the WABE Berlin. We are also opening this format to general schools with the slogan **Meine Schule Rockt!** With the support of our experienced band and vocal coaches we build bands systematically to promote their musical growth. In songwriting workshops held in cooperation with, among other partners, the Haus für Poesie and the Bödecker-Kreis, we give students the opportunity to develop their own songs under guidance.

Singing Choir – dancing in a musical

Classical music, pop, gospel, rock or jazz – we offer a broad range of musical genres. Whether trips with the choir, rehearsal weekends, or performances in churches, public spaces or in the club, we create opportunities to experience the power of making music together and the joy of playing an instrument. At the same time, everyone's self-confidence is strengthened – a good quality to acquire, for whatever life has to offer.

MUSIKSCHULE FÜR BERLIN

APPETITE FOR MUSIC?

www.tomatenklang.de

AN INSTRUMENT FOR EVERYBODY

The music school

Our courses are aimed at everyone who wants to make music: toddlers, children, adolescents, adults, including beginners, those with advanced skills, and those returning back to music-making.

With us you can learn how to play a **musical instrument**, expand your knowledge in music theory and experience and develop your body as an instrument through singing and voice lessons.

With **early musical education**, we offer age-appropriate instruction for children of pre-school age.

With **seven locations**, we are quickly accessible anywhere in the neighborhood. However, we make distances even shorter, that is why we love to cooperate with kindergartens & schools to organize lessons directly in the classroom.

Sound and pictures journey

Through our musical therapy program, we also offer **preventative courses** to improve relaxation and stress management.

FROM CLASSICAL TO ELECTRONIC

The Youth Symphony Orchestra, The Tomatini Orchestra and ensemble work

In our orchestras, children, teenagers and adults get to know and understand and themselves and each other musically. Together they rehearse various pieces and perform a spectrum of musical compositions, from light unison songs to polyphonic pieces to original scores by great masters. The fruits of this musical journey will delight musicians and listeners alike.

Digital Music Production

For teenagers from 12 and up as well as adults.

The sound of contemporary music is significantly influenced by digital production techniques. Synthesizers, drum samplers and effects have an influence on every musical style today. The mastery of conventional instruments such as guitar, piano and percussion is of great help in digital music production. But we also welcome those who are diving into musical production from another field, because modern technology allows completely new approaches. Students learn using Ableton Live.
